

What is the ENERGY STAR® Logo?

The ENERGY STAR logo helps consumers recognize energy-efficient products that help save money on utility bills. The U.S. Environmental Protection Agency (EPA) created the ENERGY STAR logo as the symbol for energy efficiency because of the direct link between wasted energy and air pollution. Manufacturers and builders voluntarily display the logo on products and new homes that meet high-efficiency ENERGY STAR guidelines, including heating and cooling equipment, household appliances, TVs, VCRs, residential light fixtures, and new homes.

Look For ENERGY STAR Features That Save Money and Energy

"I am thrilled with the ENERGY STAR package. I don't want to have a home that is not ENERGY STAR."

Michael and Shelia Burke of Ashburn Farm, VA

"Our utility bills are lower. We are saving about \$100 per month in the winter and \$200 per month in the summer."

Paula Kralovic of Northwood, OH

"Our ENERGY STAR labeled home met so many needs. We wanted lots of light, a tight house, and low heating bills. We met each of these needs. It really does work!"

Alan and Marilyn Cable of Medina, WI

EPA's ENERGY STAR label for homes is endorsed by the National Association of Home Builders and supported by the Edison Electric Institute, the American Gas Association, and thousands of U.S. home builders and businesses.

ENERGY STAR® A Simple Solution to the Home-Buying Puzzle

Money Isn't All You're Saving

ENERGY STAR® Labeled Homes

Benefits Check List

Before you purchase a new home, take a closer look at the advantages of owning a home with the ENERGY STAR label:

✓ **Reduced Utility Bills** — Spend less on monthly utility bills thanks to the energy-efficient construction and features included in ENERGY STAR labeled homes. Look for as much as 30 percent savings on heating, cooling, and hot water bills.

✓ **Healthier Indoor Air** — Breathe easier in ENERGY STAR labeled homes built to reduce indoor pollutants contributing to allergies and asthma. Sealants, foams, tapes, and other tight construction details block dust, pollen, moisture, mold, radon, and carbon monoxide from entering homes. Proper ventilation also protects against the buildup of humidity and unhealthy air.

✓ **Low Maintenance** — Enjoy the peace-of-mind of owning a low maintenance home. Homes with the ENERGY STAR label often feature tight construction which prevents costly moisture damage, energy-efficient windows which reduce fading of furniture and finishes, and high-quality heating and cooling equipment which lasts longer and performs better than standard equipment.

✓ **Comfortable and Quieter Homes** — Feel more comfortable in homes with the ENERGY STAR label. Tight construction and improved insulation not only keep out excessive heat, cold, and noise, but also ensure consistent temperatures between and across rooms. Properly sized heating and cooling equipment cycle on-and-off less which removes more humidity, provides uniform comfort, and increases longevity.

✓ **Access to Preferred Financing** — Apply for additional savings through national and regional lenders across the country offering special ENERGY STAR Mortgages. Special features include cash back at closing or reduced interested rates. For a list of financial partners visit www.energystar.gov/homes.

✓ **Help Protect the Environment** — You can feel good about protecting the environment with every ENERGY STAR labeled product. ENERGY STAR labeled homes reduce air pollution by consuming less energy than typical homes. About 20 percent of all air pollution results from energy used in homes — that's why purchasing an ENERGY STAR labeled home is a wise investment for the environment and for you.

Ask your builder for the ENERGY STAR label on your new home.
